

Subject

Door control TS 970 – switched-mode power supply instead of transformer

Description

Some of the TS 970 door controls (❶) will be produced with a switched-mode power supply instead of a transformer to ensure availability from 05/2022. The functionality of the door control remains the same. The handling and labelling of the door control differ minimally ⇒ ❷.

❷ Comparison of the TS 970 variants

TS 970 with transformer	TS 970 with switched-mode power supply
<ul style="list-style-type: none"> ▪ The changeover from 3 x 400V to 1 x 230V / 3 x 230V is implemented using a wire link. ▪ The door control has a terminal with an inserted wire link and matching labelling. 	<ul style="list-style-type: none"> ▪ The changeover from 3 x 400V to 1 x 230V / 3 x 230V is automatic. ▪ The door control has no terminal and no labelling.

Notes

- Both variants will be available for delivery in the future.
- The door control functions do not differ.
