

## Subject

ELEKTROMATEN® SE 8.60 FI with extended delivery scope

## Description

The delivery scope of the ELEKTROMATEN SE 8.60 FI (1) is being extended. As of 01/2023, the shifter cable (2)<sup>1)</sup> for emergency manual operation, which was previously available as an option, will be mounted as standard (3).

The shifter cable length is approx. 2x 0.2 m. The shifter cable length can be extended using the shifter cable extension (4) known from the other gearbox series. The emergency hand chain length is also extended from 1 m to 4 m as standard (5)<sup>2)</sup>. The chain length can also be extended (6).

## Figures

## Notes

- The changeover will take place as of 01/2023.
- The technical documentation will be adapted.
- The factory-mounted shifter cable continues to be available as a spare part and can be ordered as needed (part no.: 30005741.00020).
- The previous shifter cables that have been available as an option of lengths 2x 4 m (part no.: 30005741.00400), 2x 7 m (part no.: 30005741.00700) and 2x 10 m (part no.: 30005741.01000) will be discontinued. They are replaced with the known shifter cable extensions (4).
- Do you have any further questions regarding the changeover? Your sales representative will gladly advise you: <https://gfa-elektromaten.com/en-DE/contact.html>

1) The shifter cable can be used to activate the "rapid hand chain operator SK" emergency manual operation without a tool. Thus far and without a shifter cable, an open-end wrench size 15 (width across flats) was required  
 2) The chain can be conveniently shortened or extended as needed using the supplied chain lock piece. The specified lengths are made in reference to the total chain length (circulating).
