GfA+ App becomes evodo Stick App

Description

GfA+ App becomes evodo Stick App (1).

As part of our IoT¹⁾ strategy, the app becomes the first building block of the new evodo world. As before, the app supports you with adjustment and maintenance tasks on the door system. Together with the GfA-Stick (2), important data from the GfA door controls²⁾ can be read out and displayed (3). This includes, for example, the software version, connected hardware, programmed settings, and stored fault logs. An integrated fault guide also assists you with diagnostic and repair work on the door system.

The following changes have been incorporated into the evodo Stick App:

- New and intuitive user interface
- Compatible with the latest Android and iOS operating systems
- Update of the fault guide with additional tips for structured fault analysis on the door drive system
- Minor corrections and improvements

Part no.: 20003696

Start using the new evodo Stick-App from now on (4).

Notes

The updated app is now available in the respective stores.

Do you have any further questions about the evodo Stick App? Your sales contact will be happy to assist you: <https://gfa-elektromaten.com/en-DE/contact.html>

1) IoT: Internet of Things

2) This includes the door controls TS 959, TS 970, and TS 971.
