

## Subject

Digital Installation Instructions for ELEKTROMATEN® and Door Controls

## Description

### What's planned and why?

With paperless documents, you as a customer will have fast and secure access to your current documents at any time – independently of location and without delays. This enhances your flexibility, streamlines processes, and is also environmentally friendly. For these reasons, we will switch our installation instructions to digital format starting in the first quarter of 2025.

### Which products are affected?

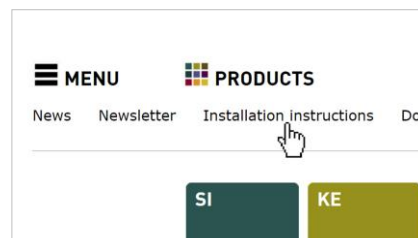

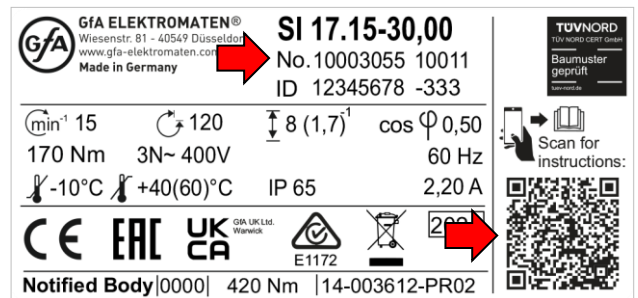

This change applies to all drive units and door controls. Instead of the traditional paper instructions, you will now find a new name plate with a QR code on our products. An additional QR code will also be included on a safety information sheet.

### How does it work?

By scanning the QR code, you'll be taken directly to the correct instruction in up to 18 different languages. You can view it online or download it for offline access. Try it out yourself using the QR code on the test name plate to the right.

### And without a QR code?

Even without a QR code, you can still access our digital instructions. Simply visit our website and select the “[Installation Instructions](#)” menu option. There, you can enter the article number and model number, of your product, which you'll find on the name plate of your GfA product.
