Symbols

Warning - Potential injury or danger to life!

Warning - Danger to life from electric current!

Note - Important information!

Requirement - Required action!

Schematic representations are based on product examples. Deviations from delivered products are possible.

1 General safety information

Specified use

The drive unit is intended for doors that must be secured against dropping.

A safety brake is integrated into the gearbox. The drive unit must be mounted directly on the shaft of the door. The drive unit can be used in hazardous areas thanks to its explosion protection according to ATEX 2014/34/EU.

The drive unit must be protected against moisture and aggressive environmental conditions (such as corrosive substances). The drive units are only suitable for indoor use. Appropriate protective measures must be taken for outdoor installation. The values specified in the technical data of the drive unit must not be exceeded. The safe operation can only be ensured if used as specified.

Note - Only for installations in Australia

This Product has not been safety tested in accordance with Australian Standard AS/NZS 60335.2.95:2020 Household and similar electrical appliances - Safety, Part 2.95: Particular requirements for drives for vertically moving garage doors for residential use for hazards when installed in residential environments.

Target audience of these installation instructions

These installation instructions are geared towards qualified persons trained in the handling of door systems. Expert knowledge, relevant skills and practical experience are what set apart qualified persons. They are capable of safely carrying out the tasks involving installation, maintenance and modernisation according to the instructions.

Safe operation

The safe operation of the product can only be ensured if it is used as specified. Follow the installation instructions. Observe all specifications, especially warnings, when installing the product in the overall system. GfA is not liable for damage resulting from non-observance of the installation instructions. The resulting overall system must be reassessed for its safety in accordance with applicable standards and directives (e.g. CE marking). These installation instructions refer only to a part of the overall system and are not sufficient as the sole instructions for the overall system. The installer of the system must prepare the instructions for the overall system. We recommend entering the danger area of the system only when the drive unit is at a standstill.

Warning - Failure to follow these installation instructions may result in severe injury or death.

- Please read these instructions before using the product.
- Keep these instructions handy.
- Include these instructions when passing on the product to third parties.

Warning - Danger from improper use of the product!

- Do not let children operate the product unsupervised or use as a toy.

Warning - Danger to life from incorrect installation!

Work carried out improperly may result in death or severe injury from electrical current or falling parts.

- Allow only competent people to carry out the work.
- Disconnect all cables from the power supply.
- Observe valid regulations and standards.
- Use suitable tools.

Warning! Danger to life from falling objects if the drive unit is subjected to impermissible forces.

Inadmissible forces (examples: collision with a forklift, dropping the drive unit, tearing or pulling on the motor) lead to damage to the drive unit. There is a risk of severe injury or death from falling objects.

- Prevent impermissible forces from acting on the drive unit,
- Check the drive unit for damage if impermissible forces have acted on it. Look even for minor damage. Lock the door during the inspection.
- Contact the service department if you have difficulty assessing the damage.

2 Technical data

Designation		Unit
Output speed	15	rpm
Output torque	250 (220) ¹⁾	Nm
Output / hollow shaft	30,00	mm
Series	SG 85F	-
Limit switch range (maximum revolutions of the output / hollow shaft)	20	-
Supply voltage	3~ 400	V
Operating current	2,70	A
Operating frequency	50	Hz
Power factor cos ϕ	0,85	-
Safety circuit	24	V
Degree of protection	IP 65	-
Temperature range	-10 / +40	°C
Operating sound pressure level	< 70	dB(A)
Maximum output speed OPEN / CLOSE for frequency inverter operation	15 / 15	min ⁻¹
Cycles per hour	15 (14,0) ¹⁾	h ⁻¹
Max. holding torque	250	Nm
Locking torque	635	Nm
Safety brake (testing centre / approval number)	14-003612-PR03	-
Manual force emergency manual operation	85	N
Explosion protection	II 2G Ex db eb h IIC T3 Gb II 2D Ex tb h IIIC 190°C Db	
Installation height	< 1000	m

Components used	
Gearbox	SG 85F 92.T3
Motor	TNSA 80D/4 14 ASP
Terminal box	8146/1041
Limit switch / emergency manual operation switch	07-2511

3 Technical data gearbox

Designation		
Series	SG85F-92.T3	
Manufacturer	GfA	
Explosion protection	II 2G Ex h IIC T3 Gb II 2D Ex h IIIC 190°C Db	
Max. output torque	400	Nm
Max. output speed	19	min ⁻¹
Shaft centre distance	85	mm
Transmission ratio	1 : 92	
Temperature range	-10 / +40	°C
Protection class	IP 65	

4 Technical data motor

Temperature class (G)	T3	
Temperature class (D)	T 100°C... T 135°	
Heating time tE	14	s
Ratio I_A / I_N	5	
Temperature range	-20 / + 40	°C

5 Technical data terminal box

Designation		
Type	Ex e 8146/1041	
Manufacturer	Stahl	
Explosion protection	II 2G Ex e II T6 II 2D Ex tD A21 IP 66 T80°C	
Certificate of verification	PTB 01 ATEX 1016	
Supply voltage	250 max. 1100	V
Terminal cross-section	2,5	mm ²
Temperature range	T6: -20 / +40 T5: -20 / +55	°C
Degree of protection	IP 65	

6 Technical data limit switch / switch emergency manual operation

Designation		
Type	07-2511-113061G	
Manufacturer	Bartec	
Explosion protection	II 2G Ex d IIC T6 II 2D Ex tD A21 IP 66 T80°C	
Certificate of verification	EPS 14 ATEX 1766 X	
Supply voltage	400	V
Temperature range	-20 / +40	°C
Degree of protection	IP 66	

CAUTION

Component damage can result

- The maximum allowable current applied to the limit switches is 2A 400V for AC-15 and 0.15 250V for DC-13.

7 Integrated safety brake

A safety brake is integrated into the gearbox of this ELEKTROMATEN. The safety brake protects against the door dropping due to breakage or wear of the gear teeth. The safety brake works regardless of the mounting position, speed and rotating direction. It is maintenance-free. The specification of the locking torque and the approval number of the safety brake are available in the technical data of these instructions.

Warning - Danger of the door dropping!

If you need to apply more than the permissible force of 390N (according to DIN EN 12604/DIN EN 12453) to move the door by emergency manual operation, this indicates a stalling on the drive unit or door. Releasing the stalling may cause the door to drop.

- Adopt a secure position.
- For drive units with brake, the emergency manual operation must be carried out against the closed brake.

8 Mechanical installation

Warning – Explosion hazard!

- Check the atmosphere for explosion hazards before commencing installation

Requirements

The permissible loads on walls, mountings, connection and transmission elements must not be exceeded even for maximum holding or locking torque (► observe technical data).

Connection elements

<p>Use self-locking connection elements with a minimum strength of 800 N/mm² (8.8).</p>	<p>Use a screw that precisely fits the hole.</p>	<p>Use adequately dimensioned washers for elongated holes.</p>
<p><small>BAGAB00001_Z002</small></p>  <p>≥ 800 N/mm²</p>	<p><small>BAGAB00002_Z002</small></p> 	<p><small>BAGAB00003_Z002</small></p>  <p>∅ 3 : 1</p>

Permissible mounting positions

Mounting

2 elongated holes are provided for mounting.

Installation

The following descriptions refer to a door which is not further defined. The door manufacturer's specifications must also be observed.

Warning – Injury or danger to life possible!

- Use a lifting device with sufficient load-carrying capacity for installation tasks.

Completely grease the door shaft.

Mount the key.

Attach the drive unit.

Tighten all connection elements (M12) with a torque of 75 Nm. Install all further connection elements according to the specifications of the door manufacturer.

9 Electrical installation

Warning – Danger to life from electrical shock!

- Disconnect the cables (mains OFF) and check that the supply is off
- Observe the applicable regulations and standards
- Ensure proper electrical connection
- Use suitable tools

Carrying out the electrical installation

Remove the cover.

BAH804_Z001

Remove the cover.

BAH801_Z001

Connect motor/limit switch connection cable

Protection against overload

Motor protection switch / motor protection relay mains operation

The "Ex" motor must be protected against overload by means of a motor protection switch or a motor protection relay. Only use motor protection relays with manual reset. Short-circuit protection is also required.

The excess current setting must be selected such that the motor is disconnected from the mains within the heating time t_E . The actual tripping time t_A at a relative operating current of I_A / I_N must be calculated on the basis of the tripping characteristic of the excess current relay. It must be ensured that $t_A < t_E$ is given.

Completing the electrical installation

Install cable entries and/or cable glands.

10 Limit switch setting

The limit switch setting defines the final limit positions OPEN and CLOSE.

Requirement

The door should open by pressing the OPEN push-button of the control. If the door closes, L1 and L2 must be swapped in a de-energised state.

Setting of OPEN final limit position

Open to the desired OPEN final limit position using the OPEN push-button.

Turn the cam of the S3 OPEN limit switch to the centre of the switch plunger ①.

Tighten the screw of the cam ②.

Check the door position:

Close the door ① until the cam is released and open it again ② until the OPEN final limit position is reached.

The OPEN final limit position can be corrected by following the fine adjustment procedure. Check the door position after each correction.

The S1 EMERGENCY OPEN limit switch is preset by the setting of the OPEN final limit position. The door must stop without posing any risks should the rotating direction be incorrect or should there be a fault with the S3 OPEN limit switch. Follow the fine adjustment procedure to correct the switching point of the limit switch as needed.

Setting of CLOSE final limit position and auxiliary limit switch

The same setting procedure applies as for setting the OPEN final limit position.

11 Motor connection

M1 Motor

12 Limit switch connection

S10 Emergency manual operation
X12 Terminal strip
S1 Emergency OPEN limit switch
S2 Emergency CLOSE limit switch
S3 OPEN limit switch
S4 CLOSE limit switch
S5 Additional limit switch
S6 Additional limit switch

13 Emergency manual operation (emergency hand crank)

The emergency manual operation is designed for opening or closing the door without power supply. Its activation interrupts the control voltage. Electrical operation is no longer possible.

Warning – Injuries due to incorrect operation or falling objects!

- Switch off voltage.
- Adopt a secure position.
- For drive units with brake, the emergency manual operation must be carried out against the closed brake.

Warning - Danger of the door dropping!

If you need to apply more than the permissible force of 390N (according to DIN EN 12604/DIN EN 12453) to move the door by emergency manual operation, this indicates a stalling on the drive unit or door. Releasing the stalling may cause the door to drop.

- Adopt a secure position
- For drive units with brake, the emergency manual operation must be carried out against the closed brake.

Caution – Damage to components!

- Do not move the door beyond the final limit positions.

Warning – Risk of injury due to uncontrolled movements and falling objects!

The drive unit could start up unexpectedly and injure people should a wrong emergency hand crank be used. A wrong crank will drop out of the mounting and injure people.

- Only use a crank with the correct diameter. The diameter is indicated on the crank handle switch:

Plug in the crank and turn until it engages (①). Open or close by turning the crank (②).

After use, the crank may be attached to the drive unit. Attach as illustrated.

14 Completion of commissioning / testing / operation

Check the following components and after that, mount all covers.

Gearbox

Check drive unit for oil loss (a few drops are not critical). Protect output shaft permanently against corrosion.

Oil leakage!

- Oil leakage may render explosion protection ineffective. Oil maintenance is inadmissible.

Safety brake in the gearbox

The safety brake requires no maintenance or inspection.

Warning – Danger of the door dropping

In the case of a gearbox damage, the internal safety brake is triggered to prevent the door from dropping. The gearbox stalls.

Releasing the stalling may cause the door to drop!

- Block the door for pedestrians and vehicles.
- Do not release the stalling. Do not use the emergency manual operation.
- Secure the door against dropping. Please observe the specifications of the door manufacturer.
- The drive unit needs replacement. Please observe the specifications of the door manufacturer.

Motor

Check motor for defective bearings.

Mounting

Check all mounting elements (consoles, torque brackets, screws, retaining rings etc.) for tightness and impeccable condition.

Electric wiring

Check connection cables and cables for damage or pinches. Check screw connections for correct seating and electrical contact.

Emergency manual operation

Function to be checked in a de-energised state. Carry out functional test only between final limit positions.

Limit switches

Check the final limit positions by opening and closing the door completely. The safety zone must not be reached.

Entire drive unit

Attention – Dust deposits !

- Properly remove dust deposits at regular, adequately short intervals, should these be unavoidable due to operation processes. Performed cleaning tasks should be documented.

Note!

- Have the drive checked annually by a specialist.
- Shorter inspection interval for frequently used doors.
- Observe the applicable regulations and standards.

15 Disposal

Dispose of packaging

Dispose of the packaging material properly according to the local legal regulations or recycle it.

Dispose of old devices

Dispose of old devices properly according to local legal regulations. Return old devices to the return and collection systems available. You can also return GfA products free of charge.

Please apply enough postage to the package and mark it as "old devices".

Notice- Environmental damage!

The gearbox contains oil.

- Ensure proper disposal according to local legal regulations.

Declaration of incorporation

within the meaning of Machinery Directive 2006/42/EC
for partly completed machinery, Appendix II Part B

GfA ELEKTROMATEN GmbH & Co. KG
Wiesenstraße 81 · 40549 Düsseldorf
Germany

Declaration of conformity

within the meaning of EMC Directive 2014/30/EU
within the meaning of RoHS Directive 2011/65/EU

We,
GfA ELEKTROMATEN GmbH & Co. KG
declare under our sole responsibility that the
following product complies with the above
directives and is only intended for installation in a
door system.

Drive unit

SI 25.15-30,00 Ex

Part no.: 10002589 00004

We undertake to transmit in response to a
reasoned request by the appropriate regulatory
authorities the special documents on the partly
completed machinery.

This product must only be put into operation
when it has been determined that the complete
machine/system in which it has been installed
complies with the provisions of the above-
mentioned directives.

Authorised representative to compile the
technical documents is the undersigned.

Düsseldorf, 10.08.2018

Stephan Kleine
CEO

The following requirements from Appendix I of
the Machinery Directive 2006/42/EC are met:

1.1.2, 1.1.3, 1.1.5, 1.2.2, 1.2.3, 1.2.6, 1.3.2,
1.3.3, 1.3.9, 1.5.1, 1.5.2, 1.5.4, 1.5.6, 1.5.7,
1.5.8, 1.5.9, 1.5.10, 1.5.11, 1.5.13, 1.6.1, 1.6.2,
1.6.4, 1.7.2, 1.7.3, 1.7.4.3.

Standards applied:

EN 12453:2017+A1:2021

Industrial, commercial and garage doors and
gates - Safety in use of power operated doors -
Requirements

EN 12604:2017

Industrial, commercial and garage doors and
gates - Mechanical aspects - Requirements

EN 60335-1:2012

Household and similar electrical appliances -
Safety - Part 1: General requirements

EN 61000-6-2:2005

Electromagnetic compatibility (EMC) Part 6-2
Generic standards – Immunity standard for
industrial environments

EN 61000-6-3:2007

Electromagnetic compatibility (EMC) Part 6-3
Generic standards – Emission standard for
residential, commercial and light-industrial
environments

Declaration of incorporation

within the meaning of Supply of Machinery (Safety) Regulations 2008
for partly completed machinery, Appendix II Part B

Declaration of conformity

within the meaning of Electromagnetic Compatibility Regulations 2016
within the meaning of Restriction of the Use of Certain Hazardous Substances in
Electrical and Electronic Equipment Regulations 2012

We,

GfA ELEKTROMATEN GmbH & Co. KG

declare under our sole responsibility that the
following product complies with the above
directives and is only intended for installation in a
door system.

Drive unit

SI 25.15-30,00 Ex

Part no.: 10002589 00004

We undertake to transmit in response to a
reasoned request by the appropriate regulatory
authorities the special documents on the partly
completed machinery.

This product must only be put into operation
when it has been determined that the complete
machine/system in which it has been installed
complies with the provisions of the above-
mentioned directives.

The following requirements from Appendix I of
the Supply Machinery (Safety) Regulations 2008
are met:

1.1.2, 1.1.3, 1.1.5, 1.2.2, 1.2.3, 1.2.6, 1.3.2,
1.3.3, 1.3.9, 1.5.1, 1.5.2, 1.5.4, 1.5.6, 1.5.7,
1.5.8, 1.5.9, 1.5.10, 1.5.11, 1.5.13, 1.6.1, 1.6.2,
1.6.4, 1.7.2, 1.7.3, 1.7.4.3.

Applied Standards:

BS EN 12453:2017+A1:2021

Industrial, commercial and garage doors and
gates - Safety in use of power operated doors -
Requirements

BS EN 60335-2-103:2015

Household and similar electrical appliances -
Safety - Part 2-103: Particular requirements for
drives for gates, doors and windows

BS EN 61000-6-2:2005

Electromagnetic compatibility (EMC) Part 6-2
Generic standards – Immunity standard for
industrial environments

BS EN 61000-6-3:2007

Electromagnetic compatibility (EMC) Part 6-3
Generic standards – Emission standard for
residential, commercial and light-industrial
environments
